Groove Milling

New Products

Carmex expands the MG Groove Milling line with new full carbide cutters.

Precision Ground Profile

- 6 flutes minimize cycle time and increase productivity
- Spiral flutes reduce cutting forces and provide smooth cutting actions
- Large flute space for effective chip evacuation
- High stability to prevent vibration
- Internal coolant bore

Applications

- Machining deep holes
- Allows high overhang
- Can fit on small or large machining centers and Swiss type lathe machines
- Same tool for internal and external grooving

Carbide grade: MT8

Sub-Micron grade with advance PVD triple coating (ISO K10-K20).

Extremely high heat and wear resistance for high performance, and normal machining conditions.

General purpose for all materials.
